ENGINEERS
AUSTRALIA

**Network
at the central
meeting hub**

Asset management is a crucial tool for optimised long-term sustained growth, enhanced stakeholder value and improved physical asset reliability and delivery.

That's why more professionals and organisations are choosing Asset Management Council Membership and joining the central meeting hub that supports the continuous development and maturity of asset management capabilities. Asset Management Council Membership enables professionals to engage in local networking and technical knowledge sharing opportunities, and provides reduced prices on education, conferences and technical seminars.

Not only do we keep our members up-to-date with the latest asset management advancements within Australia, we also provide access to global news, events and publications at special rates through our involvement as a co-founding member of the Global Forum on Maintenance and Asset Management.

It's important that we continue to advance the knowledge, understanding and access to good asset management practices. We believe it is critical to provide a central meeting hub for our members to access the latest asset management and maintenance technical information, including the Asset Management Body of Knowledge, ICOMS Conference, Training and Certification Scheme.

The Asset Management Council is committed to building individual and organisation asset capability through ongoing development and maturity of professional capability.

We believe we can support our members' journey towards becoming leaders in asset management by providing professional opportunities to establish, verify and improve personal and organisational capabilities. As a Technical Society of Engineers Australia, we can help you earn CPD points.

**Access the
latest technical
information**

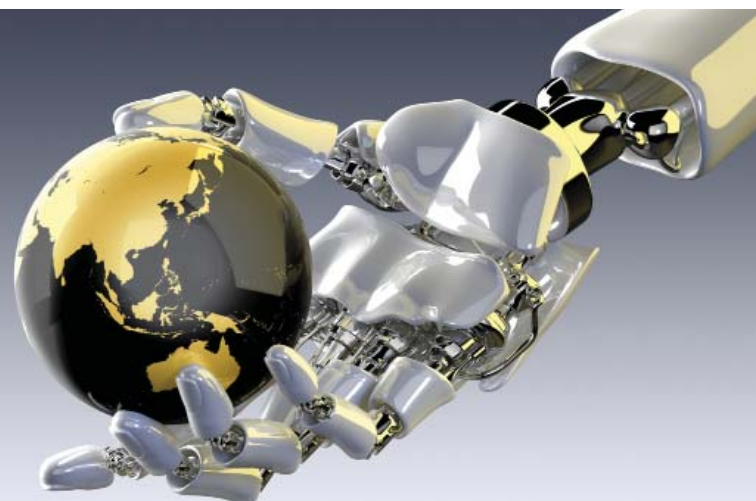

"We create an environment for learning, sharing, training and development of hands-on best practice techniques. We bring together Industry and its leaders in forums to enable ideas to be created and solutions to complex scenarios to be found."

*Peter Blake, Asset Management Council Board Member and
General Manager and Asset Manager for the Telstra
Network Integrity & Facilities Management Contract
for Silcar Pty Ltd.*

*"I have been a member of the
Asset Management Council for
over 15 years. In this time I have
been the Sydney Chapter Chair
for six years and now I am the
Overseas Chapter Chair"*

*Danny Azavedo, Overseas Chapter
Chair and Maintenance Strategy
Leader for Sydney Water*

“During my member involvement, I have been supported in my journey towards becoming a leader in asset management. I have been encouraged to enter Awards, get involved in the local Chapter committee and now I am supported as a Chapter Chair for the Asset Management Council”

Brad Thompson, Brisbane Chapter Chair and Maintenance Engineer for Brisbane Motorway Services (Clem Jones Tunnel)
