A Technical Society of

ENGINEERS  
AUSTRALIA

*"We create an environment for learning, sharing, training and development of hands-on best practice techniques. We bring together Industry and its leaders in forums to enable ideas to be created and solutions to complex scenarios to be found."*

*Peter Blake, Asset Management Council Board Member and General Manager and Asset Manager for the Telstra Network Integrity & Facilities Management Contract for Silcar Pty Ltd.*

**Access the latest technical information**

**Network at the central meeting hub**

Acquire the professional contacts, development of asset management skills and visibility within industry to establish your career in asset management.

As a growing field, asset management is rapidly becoming recognised as an essential element for any successful business. By choosing a career in asset management you are choosing a diverse and exciting profession that offers long-term career prospects, opportunities to work locally and internationally, and competitive salaries.

Make your mark on the future by choosing Asset Management Council Membership and joining the central meeting hub that supports the continuous development and maturity of asset management capabilities.

Asset Management Council Membership enables students to engage in local networking and technical knowledge sharing opportunities, and provides reduced prices on further education, conferences and technical seminars. Not only do we keep our members up-to-date with the latest asset management advancements within Australia, we also provide access to global news, events and publications at special rates through our involvement as a co-founding member of the Global Forum on Maintenance and Asset Management.

The Asset Management Council is committed to building individual and organisation asset capability through ongoing development and maturity of professional capability.

As a student you can also enter our Student Awards and have your research recognised to potential future employees. You may also be awarded a complimentary ICOMS registration, certificate and more should your entry be deemed the highest quality.

We believe we can support our members' journey towards becoming leaders in asset management by providing professional opportunities to establish, verify and improve personal and organisational capabilities. As a Technical Society of Engineers Australia, we can help you earn CPD points.

*"During my member involvement, I have been supported in my journey towards becoming a leader in asset management. I have been encouraged to enter Awards, get involved in the local Chapter committee and now I am supported as a Chapter Chair for the Asset Management Council"*

*Brad Thompson, Brisbane Chapter Chair and Maintenance Engineer for Brisbane Motorway Services (Clem Jones Tunnel)*

*"Fantastic opportunity for direct access to the professional world straight after university!"*

*Samantha Haines, Pipeline Engineer, APA Group and Winner 2010 Undergraduate Student Award*

*"Attending ICOMS and the Asset Management Council has provided me opportunities to meet, to learn and to share knowledge and experience with the asset management masters, practitioners and enthusiasts from Australia as well as overseas. As a student and professional engineer, entering the Student awards helped me gained recognition in front of industry professionals, and provided an opportunity to showcase the research that I have developed. On the other side, the awards also provided opportunities to take a time off from the hectic work/study, meet and learn new things in the conference and meet people from different industries, different region who have the same vision."*
