

# Asset Management at an International Space Station

You are invited to join Andrea Boyd, European Space Agency, for a lunchtime webinar discussion on **Thursday 21st September 2017**.

Andrea will join us live from Germany and share insights into daily life on the International Space Stations, what Astronaut training is like and future plans for space exploration plus how Australia can be involved.

## About Andrea:

Andrea is stationed in the European Astronaut Centre, the only Australian International Space Station flight controller on Earth. A Mechatronic Engineer from the University of Adelaide, she specialised in robotics in South Korea, worked for many years as an Automation Engineer in Adelaide, then underground and in the end-to-end process plant as a Mining Control Systems Specialist on site.

She is on the Australian of the Year Honour Roll for her volunteer work at schools, universities and NGOs, inspiring young people to pursue ambitious careers.

Andrea certified as an ISS Flight Operations Engineer for payload control and cross-certified in later years for crew operations, serving in the European Space Agency's human spaceflight and robotic exploration directorate.

**Moderator: Dave Daines** (National Chair AM Council)

**Enquiries:** AMCouncil Office: **03 9819 2515** or **info@amcouncil.com.au**

## Date:

Thursday 21 September 2017
