

## Reliability Impact on Financial Performance

ReliaSoft would like to invite you to a **FREE** seminar.

The objective of a reliability program is to forecast future events, based on failure behaviours and maintenance policies.

Being aware of what is likely to happen in the future provides a great advantage to management in allocating limited resources to effectively and efficiently minimize maintenance costs. Although most people realize reliability is the key factor for these costs, many companies are still not investing in a proper reliability program.

Designed for managerial and senior level staff, this *free* one-day seminar introduces the principles of reliability, explains the reliability impact on financial performance and explores the tools and technologies that empower your reliability engineers.

### Course Outline

This presentation covers the following topics and includes several case studies and examples:

- What the purposes of a reliability program are.
- How reliability is calculated.
- What the optimum preventive maintenance interval is.
- How to determine the equipment optimum overhaul time.
- What the science and concept behind RAM analysis is.
- What are the technologies and the challenges.

### Date, Time and Venue

Date : May 9, 2011

Time : 8:30 a.m. – 3:30 p.m.

Venue : Bentley Technology Park Function Centre 2, Western Australia

### Organizers

ReliaSoft
