

ASSET MANAGEMENT COUNCIL

Gain Asset Management Recognition

Asset Owners

Are your Asset Management Practitioners certified?

Asset Management Practitioners

Are you accepted in asset management?

A Technical Society of

ENGINEERS
AUSTRALIA

Consider your potential

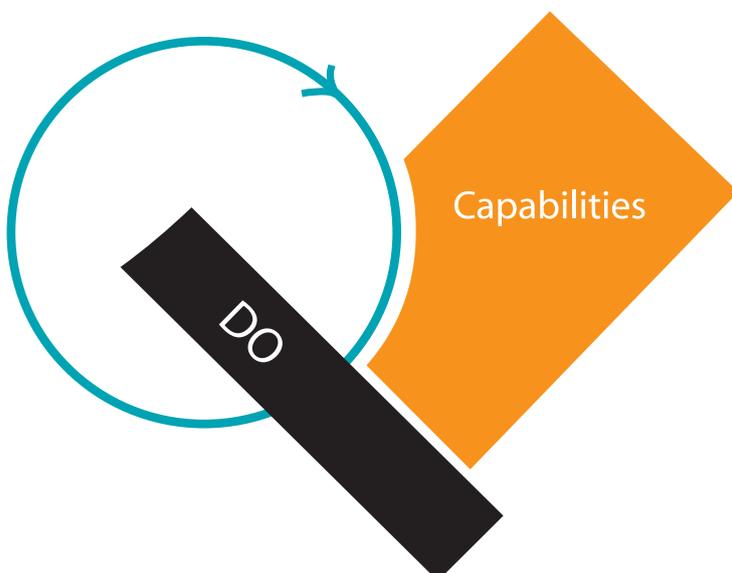

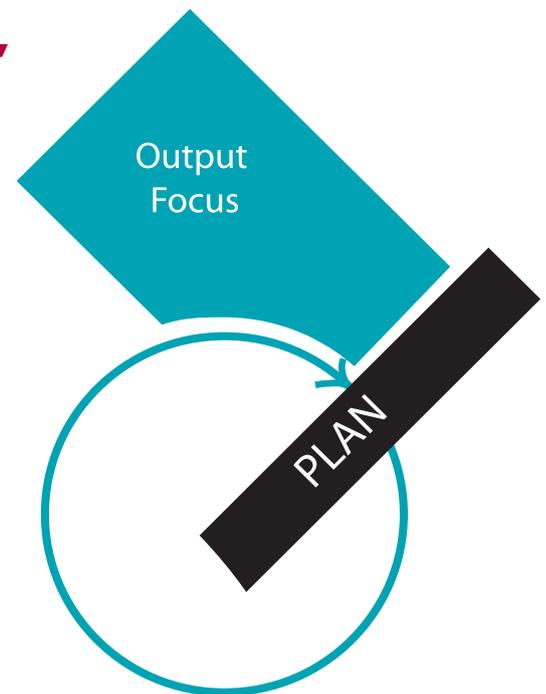

In an ever-changing and competitive work environment, it can be difficult to distinguish yourself from your peers. You want to exemplify professionalism, effectiveness and dedication to your organisation, industry, and to yourself. It's no easy task.

Begin the certification scheme, now

Becoming certified in asset management offers numerous and extensive benefits along your professional journey. It provides you with national and internationally recognised certification and demonstrates your commitment to the practice of asset management.

The Asset Management Certification Scheme offers numerous key benefits to the global asset management community.

For organisations there is improved business performance by increasing opportunity for recruitment, workforce retention and attraction, and transportability of people.

"Certification offers verification of my proficiency in the asset management field to my work colleagues and associates."

Mark Brunner, Reliability and Maintenance Systems Superintendent for Onesteel and Certified Senior Practitioner in Asset Management (CSAM)

For individuals, key benefits include verification of your capabilities, recognition of your knowledge and skills and clear evidence of continuous improvement in your professional development.

How the Certification Scheme Works

. Overview of the Certification Requirements

Level	Core Competency Requirements	Sets Needed	Yrs Exper.	Method of Validation
 CAAM	Meet the requirements of 50% of the CAAM core competencies	9	2	Course such as Asset Management Fundamentals or verification by 1-2 referees
 CPAM	Meet the requirements of 70% of the CPAM core competencies	45	5	Attainment of competencies verified by 1-2 referees
 CSAM	Meet the requirements of 60% of the CSAM core competencies	800	8	Attainment of competencies verified by 1-2 referees
 CFAM	Meet the requirements of 50% of the CFAM core competencies	25	12	Peer Review Panel

“Like many others I know who started off as tradesman and moved into leadership and project management roles, there is no time to study for a higher qualification in engineering or asset management at university.

Certification enables me to gain recognition of the skills and knowledge I have accumulated over the past thirty years working in industrial related environments”

Les Pepper, Plant Performance Team Leader for Genesis Energy and Certified Practitioner in Asset Management (CPAM)

The Asset Management Council wishes to thank BHP Billiton Iron Ore WA, Newcrest Mining, United Group and Woodside Energy for their support and guidance in developing this scheme.

The 4 Levels an Individual can achieve:

Certified Associates have an awareness of the Competency Elements that comprise the Asset Management Profession and an understanding of their contributions to the successful application of asset management principles.

Certified Practitioners have demonstrated achievement in a range of competencies that comprise the Asset Management Profession and an understanding of their contributions to the successful application of asset management principles.

Certified Senior Practitioners have demonstrated advanced achievement in multiple competencies that comprise the Asset Management Profession and provide significant tactical contributions and synthesis of strategies and higher level objectives.

Certified Fellows provide a strategic contribution within a broad set of guidelines and objectives, displaying a high degree of synthesis and an ability to readily solve complex asset management problems.
