CHALLENGES AND OPPORTUNITIES FOR EMERGING TECHNOLOGY SOLUTIONS IN ASSET MANAGEMENT

In this conversational session, Amanda Sequeira, CEO of VAPAR, will talk about her journey and leadership in the area of emerging technology within asset management.

With a focus on successes and lessons learnt, Amanda will explore what aspiring leaders in the asset management space can learn from her experience.

Presented by:
Amanda Sequeira, CEO, VAPAR

As VAPAR's CEO, Amanda co-founded the company with a vision to bring emerging technology into the Asset Management space and revolutionise the way infrastructure is tracked, repaired, and maintained. With a background in civil engineering, Amanda used to manually review CCTV pipe inspection videos for 8 hours a day at the beginning of her career. Since then, she has worked in design, construction and remediation of drainage and sewer pipes for the public sector. Having guided VAPAR from infancy into an international growth stage, VAPAR now analyzes over two hundred thousand metres of wastewater infrastructure for dozens of clients across Australia, New Zealand, and the UK.
